

HOVER EFFECTS AND TRANSITION USING CSS

BY:V.MAHARANI
I BCA-BATCH I

TITLE SLIDE

Interactive webpage design

Button, image, and card hover effects

Smooth transitions with CSS

INTRODUCTION

Hover effects change element style when the mouse is placed over it

Transitions make the change smooth and attractive

Used to improve user experience and webpage appearance

HTML ELEMENTS USED

`<h1>` for the heading

`<button>` for interactive button

`<img>` to display an image

`<div class="card">` for creating a content card

These elements form the structure of the
webpage

BUTTON AND IMAGE HOVER EFFECTS

Button changes color from blue to green on hover

Button increases size using scale(1.1)

Image rotates slightly and zooms in on hover

Transition property makes both effects smooth

CARD HOVER EFFECTS

Card has white background, padding, and shadow

On hover, card moves upward using `translateY(-10px)`

Shadow becomes deeper to create a raised effect

Makes the card more attractive and interactive

CONCLUSION

Hover effects and transitions improve webpage design

They make elements more interactive and visually appealing

CSS helps create smooth animations easily

Useful for modern and responsive web development

The background features abstract geometric patterns in teal. In the top-left and bottom-left corners, there are nested rectangular outlines. In the top-right and bottom-right corners, there are clusters of small teal circles arranged in a grid-like pattern. A diagonal teal line runs from the top-left towards the bottom-right, intersecting the other elements.
