

FONT AEWSOME

BY:V.MAHARANI
I BCA-A

INTRODUCTION

- Font Awesome is an icon toolkit
- Easy integration with HTML projects
- Provides thousands of scalable icons
- Icons are vector-based and responsive
- Widely used in modern web development

HTML STRUCTURE

- HTML creates the webpage layout
- `<head>` contains title and stylesheet links
- `<body>` contains page content
- Icons are added using `<i>` tags
- Classes define the icon type

LINKING FONT AWESOME LIBRARY

- External CDN is used to load icons
- No need to download icon files
- Link added inside the <head> section
- Provides access to all Font Awesome icons
- Fast and easy implementation

CSS STYLING

- Sets font family to Times New Roman
- Centers all webpage content
- Adds light gray background color
- Defines icon size and spacing
- Creates a clean and attractive design

HOVER EFFECT

- Hover effect improves user interaction
- Icon color changes to blue
- Icons enlarge using scale
- Smooth transition using CSS
- Enhances visual appeal of the webpage

CONCLUSION

- Displays multiple icons on a webpage
- Uses Font Awesome CDN for icons
- Applies CSS styling and animations
- Improves website navigation and design
- Demonstrates simple and effective icon integration
