

# IMAGE SLIDER

---

BY:V.MAHARANI  
I BCA A

# INTRODUCTION

---

- An image slider shows multiple images one after another
- Commonly used in websites and photo galleries
- Helps display many images in limited space
- Makes websites more attractive and interactive

# HTML STRUCTURE

---

- HTML creates the basic structure of the webpage
- `<div>` is used as the slider container
- `<img>` tag displays the current image
- Buttons are added for navigation
- `onload` event displays the first image when the page opens

# STYLE WITH CSS

---

- CSS improves the appearance of the slider
- Width and height are fixed for proper image display
- Background color gives a clean look
- Rounded corners are added using border-radius
- Buttons are styled for better user interaction

# JAVASCRIPT FUNCTION

---

- Images are stored in an array
- JavaScript controls image changing functionality
- Index value tracks the current image
- Functions are created for next and previous images
- `showImage()` updates the displayed image

# AUTO IMAGE CHANGE

---

- `setInterval()` is used for automatic sliding
- Images change every 3 seconds
- Provides a smooth slideshow experience
- Reduces the need for manual clicking
- Makes the webpage more dynamic

# CONCLUSION

---

- The Image Slider combines HTML, CSS, and JavaScript
- It creates an attractive image gallery system
- Users can navigate images easily
- Automatic sliding improves user experience
- Useful for websites, portfolios, and advertisements

The background features two large, light pink geometric shapes. One is a triangle on the left side, and the other is a larger, more complex shape on the right side, both pointing towards the center.

**THANK YOU**
